SustainABLE Box

SustainABLE Box is great news for the planet. Created to capture your hard-to-recycle items, we'll give them a new life by recycling them through one of our trusted and pioneering service partners.

The problem

- Despite our best efforts, there are many hard-to-recycle items used in businesses
- Without specific recycling services, these items are often sent to energy recovery and their value is lost forever

Our solution

We've made it 'SustainABLE' to capture your hard-to-recycle items and give them a second life.

- **We'll do the hard work for you** - we'll deliver your box and once full, collect it directly from your office
- **No smoke and mirrors** - working with our network of trusted re-processors, we'll find recycling routes and let you know exactly where your materials end up
- **Do your bit for the planet** - SustainABLE Box helps you increase your recycling rates and reduce general waste

What can we collect?

We currently collect the following materials in our SustainABLE Box:

- Coffee pods
- Cup lids
- Crisp packets
- Plastic toiletries
- Snack wrappers
- Plastic film
- PPE
- Print cartridges
- Stationery
- Flexible plastics

Have other hard-to-recycle items?

How does SustainABLE Box work?

1. Order a box and a pre-paid material sticker for the items you're looking to recycle
2. Once delivered, assemble your box and attach the material label to the lid - this acts as a handy poster!
3. Fill your box with that material and let us know when it's full
4. We'll arrange a collection and recycle everything, including the box!
5. Start the journey again by booking in an exchange and we'll deliver a brand new box and label
